American College of Thessaloniki
2014

ABOUT

A Junior Developer with full stack skills and a growth mindset. Having worked previously in marketing for a carbon management software company, I gained valuable experience working in an agile environment across various teams including designers and engineers to market the best product to prospects and customers. My career transition was driven by my childhood aspirations and my strong passion for technology that has a positive impact. Through my 7+ years of varying professional experiences I am confident in my abilities to collaborate effectively, communicate, problem solve, work efficiently and adapt. I'm excited to apply these skills and experiences in my next role.

EXPERIENCE

FULL STACK DEVELOPMENT

School of Code | 2024

An intense 16-week bootcamp that trains individuals selected out of 1000's of applicants for industry best practices and standards. Over this period I worked in an agile environment contributing to building and designing projects across 13 diverse teams.

- Participated in weekly hackathons and sprints around web development, backend, SQL, QA, UX/UI, security and technical writing.
- Developed collaborative coding skills through pair programming and feedback.
- Successfully deployed and hosted projects incorporating CI/CD.
- Implemented DevOps best practices in team projects.
- Attended guest talks from industry leaders across companies like Microsoft, Santander, Sage Technology and Iceland Foods.

PROJECTS

School of Code Final Project

SoCBrain - [view project](#) (Login: bootcamper@bootcamper.com, PW: 123456)

[View GitHub repository](#)

Stakeholder: The School of Code, a full-stack bootcamp.

Problem: Tasked with improving the user and admin experience of the School of Code Learning Management System.

Solution: A slick and engaging quiz experience for the School of Code bootcampers' to test their technical knowledge. This app tracks technical progress for coaches to view via a dashboard, allowing for analysis of data to improve the bootcampers' learning experience. Within a year, SoCBrain will be a full-scale LMS allowing for a unique enhanced user and admin experience with limitless potential.

Tech Stack: Next.js, Vercel, Typescript, Supabase, Tailwind CSS, Daisy UI and Formik

INTERESTS

Plant Care
Sustainability in tech
Playing tennis
Exploring the world through cooking

PROFESSIONAL DEVELOPMENT

AWS Summit London
React Conf 2024 (virtual)

DevOps: GitHub Flow, Playwright and GitHub Actions (SDLC)

Responsibilities: Design, wireframing, front-end code, back-end code and code reviews.

Personal Projects

Weather App - [view project](#)

Tech Stack: Javascript, CSS, OpenWeather API

SENIOR FIELD MARKETING COORDINATOR

SWEEP | 2022-2024

Carbon Management Software Company

- Updated marketing and partner activities on website.
- Led planning and operational activities of all events.
- Represented Sweep's mission externally through active exchange with the industry, helping build network and thought leadership.
- Collaborated with marketing, sales and brand to seamlessly integrate marketing into the customer journey, generating qualified leads and helping the Sweep brand become top of mind.

EVENTS OFFICER

ClientEarth | 2019-2022

Environmental Law NGO

- Led the execution of in person, hybrid and virtual events globally, including annual summits ([2020](#), [2021](#)).
- Created landing pages, edited media and coordinated communication strategy.
- Drafted event briefings, agendas, risk assessments, reports, stats and copy for invitations, social media and registration pages.

COMMUNITY EVENTS AND GENERAL COORDINATOR

American School in London | 2018-2019

Educational Institute

- Supported the Advancement team in the development and production of events, communications, and programming.
- Assisted with communications and event planning for local and international alumni events.
- Provided general marketing and administrative support to the communications team.
- Inputted, organised, and exported data into Raiser's Edge.
